

FMCG

IQ Retail's comprehensive, fully integrated solutions, have built-in flexibility to offer single or multi-site as well as single or multi-terminal capability to meet the solution requirements of any FMCG. IQ Retail combines robust accounting functionality with integrated point-of-sale, inventory control, quotations, purchase orders, accounts receivable, accounts payable, custom ordering, ledger and everything in between. It gives you traceability throughout the system with exceptional audit tracking and reporting, providing a complete business management system for the FMCG industry.

IQ Retail offer numerous functionalities:

- Deliveries and collections module
- Cascading items
- Product price variants & associated items
- Multi store with head office & warehousing environment
- Auto re-ordering and replenishment defined per item
- Multiple stock count methods with full variance analysis, live or batch
- Multiple-dimensional promotions
- Multiple bin locations per item with warehouse stock bin control
- Barcode scanning & printing
- Handling of empties and crates for deposit / returns
- Warehouse & distribution management with order picking
- Lifecycle / batch control / expiry dates
- Multiple cost options - latest, highest, average, future, base cost & manager's cost
- Lay-bye's
- SMS marketing
- Weighted items with scale integration
- Warehouse picking & bin control

Benefit from our add on modules offered for the FMCG industry:

ePOD:

Electronic Proof of Delivery is an app, fully integrated with your IQ Software, that is installed on a driver's mobile device that provides the ability of managing the customer delivery cycle, check off & confirm the delivery, capture recipient names, obtain signatures & to automatically inform staff of any issues that may have surfaced during the delivery so that they can be resolved quickly & efficiently.

Benefits:

- Reduce errors in delivery & improved error resolution
- Digital audit trail reduced disputes
- Signed PODs available electronically and immediately
- Reduced stock losses
- Delivery notifications to clients
- Record damages, capturing narrative and images - provides immediate notification to branch staff of failed or abandoned deliveries
- Customer satisfaction survey, allowing you to take immediate action when notified of a dissatisfied customer

IQ POS Offline:

IQ POS Offline is a supplementary feature to the IQ solutions, designed to allow users to continue trading on a localised instance of their IQ software in the unfortunate event of connectivity failure.

Benefits:

- Utilise FTP protocol to send files to branch and head office and vice versa.
- Trade offline in POS.
- Send stock, departments, promotions and promotion items from head office to branch.
- Transactions to stock and ledger are posted after day end procedure at branch and head office.
